## Urbanization with Chinese Characteristics: Academic Connotation, Practical Exploration, and Theoretical Cognition

Shi Shuhua Lv Yang

**Abstract:** The present article reviews the academic origin of urbanization with Chinese characteristics and gives a general definition. Combining the practical exploration, it explains distinct connotation of urbanization with Chinese characteristics, namely the unity of exogenous and endogenous urbanization. The difference in the developmental mode between China's urbanization and that of other countries prompts the reflection on the relations between government and market.

**Keywords:** Chinese characteristics; urbanization; practical exploration; theoretical reflection
