On Creativity of Knowledge Workers From the Perspective of Work Values

Peng Zhengan Ren HuanLiang

Abstract: This study explores the causing mechanism of creative behavior, based on the perspective of work values and the moderating role of work autonomy. Data were collected from 299 employees, and the empirical results from hierarchical multiple regression suggest that (1)work values has a significant effect on innovative behavior, comfort and security (Comfort) has a significant negative impact on innovative behavior, competence and growth (Competence) has a significant positive impact on innovative behavior, status and independence (Status) also has a significant positive impact on innovative behavior.(2) Work autonomy plays a moderating role between work values and innovative behavior. Work autonomy has a significant negative moderating effect on the relationship between Comfort and innovative behavior. On the contrary, Work autonomy has a significant positive moderating effect on the relationship between Competence and innovative behavior, as well as that between Status and innovative behavior.

Keywords: work values; creative behavior; work autonomy; knowledge worker
