Realistic Chinese Individuals the Logical Starting Point of Political Development Path of Socialism with Chinese Characteristics

Qiao Yaozhang Gong Jianqing

Abstract The logical starting point is different from the starting point of research and that of history. Based on Marxist theories on people and politics, “realistic person” and “realistic individual”, combined with China’s political reality, we hold that the logical starting point of the political development path of socialism with Chinese characteristics should be “realistic Chinese individuals”. Realistic Chinese individuals are not only different from realistic Chinese people, but also different from the Chinese people in history, the Chinese people in the future and foreigners. The Chinese people should take their own realistic political development path of socialism with Chinese characteristics by themselves. China’s realistic political life is closely related to realistic Chinese individuals, who cannot consciously or unconsciously keep away from political life, which requires realistic Chinese individuals to improve their political and moral quality as well as scientific and cultural ability, to grow from a natural person to a social and political person, and to actively create conditions for the active participation in the political life at various levels. Only when all realistic Chinese individuals achieve free and full development, can the real political development of socialism with Chinese characteristics be realized.

Keywords socialism with Chinese characteristics; political development path; logical starting point; people and politics; realistic Chinese individuals
